SkyLink is a leading aviation transport and logistics service provider in support of peacekeeping missions, disaster relief, military contingency operations, humanitarian operations, and other governmental and commercial applications.

The Company prides itself on getting people and cargo where they need to go – on time and under any conditions.

The Company executes difficult jobs in difficult places, often performing missions in challenging environments.

For over 20 years in more than 75 countries, SkyLink has delivered assistance and support services in the most challenging and remote areas in the world.

SkyLink’s African agent network covers 45 out of the 57 countries.

Utilizing Rotary & Fixed wing aircraft, Transporting Passengers & Cargo
Provision of rotary wing aircraft through partnerships and joint ventures:

Eastern
- MI-8MTV
- Kamov 32
- MI-26
- An-2
- Others as required

Western
- Bell 212, 412
- Super Pumas
- Others as required

*SkyLink is asset light and has the ability and the network to match any aircraft type to the specific requirements*
Fixed Wing

Provision of fixed wing aircraft through partnerships and joint ventures:

Eastern
- Antonov -225
- Antonov -124
- Ilyushin 76
- Antonov 26/32/24
- Antonov 12
- Antonov 28
- LET 410
- Others as required

Western
- Boeing 747, 767, 737
- Beechcraft 1900
- Cessna Grand Caravan
- Airbus 300, 320
- MD-11, DC-10
- Others as required

SkyLink is asset light and has the ability and the network to match any aircraft type to the specific requirements
SkyLink has the ability to transport passengers worldwide through its existing network:

- Rotary/Fixed wing aircraft tailored to client requirement
- Secure air transportation
- Military, Government, Commercial and VIP
  - Military and civilian air bridge
- Compliant with local rules and regulations
- Blue chip insurance coverage to meet western requirement
- Emergency evacuation
- Medical evacuation
- Managing ad-hoc and long term programs
- Full service passenger support
SkyLink transports any kind of cargo worldwide through its existing network:

- Government & commercial Cargo
- Engineering, Industrial and infrastructure development
- Specialized cargo
  - Mail
  - Hazardous Material
  - Outsize Cargo
  - Time/temperature sensitive and high value
- Project sustainment and re-supply
To-theatre Passenger & Cargo Support

- Decades of experience in aircraft charter to challenging markets and environments
- Ability to service its clients’ needs to deploy aircraft at a moment’s notice
- Services include passenger charters for VIPs, government officials and executives, transportation of cargo of any size with fully equipped dedicated aircraft
- Support team operates both fixed- and rotary-wing aircraft
- SkyLink performs over 600 charter flights per year on behalf of commercial, military, and non-governmental organizations
- Offers global emergency airlift of both passengers and cargo, military re-supply into hostile areas, medical evacuation, and a vast range of complementary ad-hoc services
Medical Evacuation

SkyLink provides:

- Timely and efficient movement
- Aircraft fitted with the medical suite to meet client need
- Medical staff and equipment for enroute care
- Partnerships with internationally recognized medical providers
- Anywhere
In case of an emergency evacuation, SkyLink will dispatch appropriate personnel and resources through its extensive and international network to provide:

- Immediate and rapid movement of people and assets to safety
- Fixed and rotary wing aircraft as needed
- Assessment of threat and danger area(s)
- Contingency planning and execution
- Emergency stand-by operations
- Coordination between local government(s) and client
- Ground operations
Disaster Relief

In the event of natural and/or man-made disasters ranging from fires to hurricanes, tsunami, floods, earthquakes, tornadoes, hazardous materials spills, accidents etc. SkyLink will:

- Provide the transportation support to government and humanitarian agencies:
  - Air transportation to include fixed and rotary wing aircraft
  - Ground transportation to include trucks, buses, coaches
  - Maritime transportation to include ships, barges
- Dispatch a 24/7 Operations Control team to coordinate with local authorities and provide site assessments
SkyLink has the ability, the knowledge and the experience to provide aerial firefighting utilizing:

- Fixed and Rotary Wing Aircraft
- Eastern and/or Western Airframes
- Team of experts dispatched to the desired locations worldwide
- National contract providing seasonal coverage in multiple locations
SkyLink has the ability to support its clients by providing aircraft capable of performing surveillance flights in order to:

- Take aerial photos
- Monitor ground activities
- Aerial sensor carry (Acoustic, infrared etc...)
Assessment

Prior to commencing operation in its theatres, SkyLink dispatches a team of experts to provide:

- Technically accurate report on the site conditions
- Availability of required resources
- Threat and risk assessment
- Suitability of the facilities:
  - Airport
  - Fuel farms
  - Lodging
  - General infrastructure
With its existing resources, SkyLink’s ground handling and airport services include:

- Passenger and Cargo Handling
- Ground Handling Equipment
- Flight Planning
- Flight Permits
- Customs Clearances
- Ticketing and Passenger Services
- In-Flight Catering
- Local Authorities Operating Permissions
- Warehousing and Storage Capabilities
- Refueling Services
- FBO Services
Ground Handling & Airport Services

- Provides ramp, cargo, and all ground handling services for commercial and military aircraft (domestic and international)

- SkyLink’s handling professionals are trained on IATA guidelines to assure safe, secure, efficient, and effective operations

- Focused on providing for all of its customer needs while maintaining the highest level of safety

- Capable of operational, engineering, maintenance, security, and management support that will improve efficiency and the overall safety of a given airport

- In 2002, SkyLink was awarded contracts for the assessment and implementation of re-construction of the three largest airports in Iraq
Fuel

SkyLink fuel services include developing, implementing, maintaining and operating turnkey fuel services in remote locations:

- Fuel Sourcing
- Fuel Storage
- Fuel Testing
- Bulk and Retail Fuel
- Into-Plane Services
- Quality Control and Assurance
SkyLink has provided fuel services to distribution networks requiring millions of gallons per day.

All-inclusive services include project planning and coordination, remote fuel site set-up, procurement, distribution, and daily operational management.

Approach addresses the “360 degree requirement”:
- Both ground and air movement
- Storage tanks
- Bladders
- Pumps
- Testing and operational staff

SkyLink designed and built a nationwide fuel supply and distribution operation in support of international peace and humanitarian operations in Sudan.

- Built over 20 fuel farms and imported and distributed 50 million liters of fuel throughout the region.

Fueling services in Iraq and Afghanistan comprises millions of liters per day and serve the aviation fuel requirements of every major airport in Iraq, with an excellent record of safe, efficient, and effective performance.

SkyLink subscribes to both the letter and spirit of the IATA guidelines for efficient and effective operations of all fueling services.
Site Operations

With its experience in remote areas, SkyLink can develop and implement a scalable turn-key solution from first response to enduring and sustainment operation:

- Camp Design and Construction
- Camp Operation and Management
  - Lodging
  - Power Source
  - Internet Services
  - Laundry Facilities
  - Gym and recreational facilities
  - Dining Facilities
  - Waste & Water management
  - Site services
SkyLink has the capabilities, through its maintenance oversight organization on-site, to provide and manage aircraft maintenance as follows:

- Scheduled and unscheduled maintenance utilizing qualified aircraft maintenance technicians
- Repair, inspection or modification work through partnerships
- Compliant with the aircraft original equipment manufacturer (OEM)
SkyLink has performed many airdrops in some of the most austere environment. We have civil and military load masters and jump masters from the U.S., UK and Canada. This included:

- Food drops
- Re-supply goods
- Pamphlets and flyers
- Medical supplies
- Paratrooper support
Project Management & Consulting Services

- Provides trained staff and consultants capable of supporting any logistic or transportation requirement
- Offers time-tested, innovative solutions to meet its customers needs in challenging environments
- Capable of training and managing people on the ground in even the most austere locations
- The Company’s services include large scale aviation project management, supply chain implementation, and consulting with local non-governmental organizations to implement best practices in emergency situations
Unique Projects Include

**American President Lines, Ltd. Sea/Air Multi-Modal Dubai to Afghanistan** SkyLink provided airlift support with a multiple Boeing 747 aircraft operating weekly between Dubai Al Maktoum Airport (DWC) and multiple locations in Afghanistan. Freight was tendered in the US to the Prime Contractor APL for movement by sea on U.S vessels, arriving into the Jebel Ali port and moved in-bond to the airport for carriage by SkyLink. The concept of the sea/air was introduced several years ago when APL and SkyLink teamed together and have since successfully launched the program together carrying DoD/USTRANSCOM freight from the U.S. into and out of Afghanistan.

**Emergency Relief Flight for FEMA/GSA** Operated the single largest aircraft in the world transporting electric generators to American Samoa following the Tsunami that hit on September 29, 2009.

**Air transportation of the Axum Obelisk** This historic 1,700 year-old, 30-meter-tall monument was moved back from Rome to Axum, Ethiopia.

**Currency transportation contract in Iraq** SkyLink provided both aviation, security and all of the logistics planning and sustained operations necessary to transition from the old to the new currency under the auspices of the CPA and the new government of Iraq.

SkyLink combines quick response and mission execution capabilities with direct experience in more than 75 countries.
End-To-End Mission Support Capabilities

SkyLink provides mission critical insight and services throughout the entire engagement – from planning to execution.
Competitive Advantage

**SkyLink’s Unique Advantage**
- Flexible business model
  - Source the right aircraft for the mission
  - Financial/operational flexibility
  - Unique access to Eastern aircraft
- Comprehensive portfolio of organic aviation services and logistics capabilities
- In-house mission, logistics, and base operations
- Mission integration including mission conflict resolution
- Integrated communication infrastructure tied into military networks
- Preferred relationships with all relevant aircraft operators globally – allows SkyLink to efficiently supply the optimal aircraft for any mission
